Recommendation Letter

Evaporation system: Installed at Gamsberg Vedanta Zinc International Mine

To whom it may concern

This letter serves as confirmation that Flowcentric Mining Technology completed a Turnkey Installation at our mine in February 2020 under the following scope of work:

- 4 x 22kW Rhino Evaporators (Supply & Install)
- 4 x 22kW Booster pumps and all pipework (Supply & Install)
- MCC (Containerized) (Supply & Install)
- All downstream electrical cables (Supply & Install)
- Main cable from Substation to MCC (Supply & Install)
- Mobile concrete slabs (Supply & Install)
- Test and commissioning of system

In general, we are happy with the evaporation system performance, quality of equipment and workmanship provided. They are also assisting us with technical support on the system telephonically (After sales service).

I recommend them for similar projects.

Regards.
