

Eco-M General-Purpose Cleaner

Cut through grease and disinfect surfaces throughout the workplace, with the Eco-M degreasing and disinfecting general-purpose cleaner.

Eco-M has excellent cleaning and degreasing properties and is safe to use on most surfaces.

FlowCentric Mining has developed the next-generation industrial cleaning product, Eco-M, to fulfil the needs of our industrial and commercial clients.

Our multi-purpose cleaner Eco-M has excellent cleaning and degreasing properties and is safe to use on most surfaces.

Eco-M is the ideal solution for the proper disinfection and decontamination of surfaces. The chemical dislodges biofilm from soiled surfaces and, as a result, the fat and protein become water soluble and are easily removed by rinsing or wiping the treated surface.

SANS 1828 Compliance

Eco-M complies with the corrosion test criteria as specified by SANS 1828.

Areas of Application

Eco-M is suitable for the cleaning and disinfection of the following:

- Surfaces requiring thorough cleaning and disinfection, especially when cleaning time is limited.
- Kitchens and general food processing areas and equipment.
- Clinics, hospital rooms, veterinary clinics, toilets, and amenities.
- Fat traps and drains.
- Workshops, including heavy machinery and factories, plants, and abattoirs.

The product is specified as food safe for cleaning food processing surfaces and equipment.

It is non-corrosive to metals even after repeated applications or with prolonged contact time.

Product Application

Best overall product performance will be achieved by applying Eco-M in the form of a fine spray. This can be done using common trigger sprays for small areas or pump-up pressure bottles for larger areas.

A dwell time of 1 - 2 minutes should be allowed for proper cleaning and disinfection.

Rinse afterwards with clean water.
